

Nimbus Robotics GmbH - Annual Report FY2025

Fiscal year 2025 covers the period 1 April 2024 to 31 March 2025. All amounts are in millions of euros (EUR m) unless stated otherwise. Nimbus Robotics GmbH is headquartered in Berlin, Germany, and was founded in 2016.

1. Letter from the CEO

Dear shareholders, FY2025 was the year in which Nimbus became a two-product company in every sense. Our Atlas heavy-payload platform moved from early adopters to mainstream cold-chain and automotive customers, and our software and services business grew faster than hardware for the second year running. We ended the year with 310 active customers across 19 countries.

We also learned hard lessons. A field incident with Atlas cold-storage units in February 2025 showed that our validation at sub-zero temperatures was not good enough, and it exposed how dependent we are on single suppliers for a few critical components. Both issues are addressed in the risk section of this report. Our collaborative arm, Kestrel, completed 38 pilot installations and general availability is planned for FY2026. - Dr. Mira Okafor, Chief Executive Officer

2. Products

Porter (model AMR-400) is our autonomous mobile robot for tote and pallet moves up to 400 kg. Launched in 2019, it remains our volume product, with 2,390 units shipped in FY2025.

Atlas (model AMR-700) carries loads up to 700 kg and is available in a standard version and a Cold Storage (CS) version for freezer warehouses. Atlas is certified to ISO 3691-4. We shipped 905 Atlas units in FY2025, up from 610 in FY2024.

Kestrel (model CR-12) is a six-axis collaborative arm with a 12 kg payload that can be mounted on Porter for mobile picking. Kestrel is in pilot deployments; it is not yet generally available.

Nimbus Fleet Console is our cloud software for fleet management, over-the-air firmware updates and analytics. It is sold as an annual subscription per robot.

3. Financial performance

Revenue by segment and key figures for the last two fiscal years:

EUR m	FY2024	FY2025
Hardware revenue	151.2	184.9
Software & services revenue	31.2	46.7
Total revenue	182.4	231.6
Gross margin	38.1%	40.6%
Operating profit (EBIT)	9.1	19.5
Research & development expense	27.4	33.8

By region, EMEA contributed 58% of FY2025 revenue, North America 31% and Asia-Pacific 11%. Our largest customer, Frostline Logistics, accounted for 9% of FY2025 revenue.

Unit shipments: Porter 2,140 (FY2024) and 2,390 (FY2025); Atlas 610 (FY2024) and 905 (FY2025); Kestrel 0 (FY2024) and 38 pilot units (FY2025).

4. People

On 31 March 2025 Nimbus employed 1,140 people: 610 at the Berlin headquarters, 290 at our engineering centre in Pune, India, and 240 in Austin, USA, which hosts sales, field service and our North American refurbishment line. Voluntary attrition was 9.8% (FY2024: 12.1%).

5. Risk factors

5.1 Supply concentration. Several components are single-sourced. The most significant is the LX-9 3D lidar module used in every Atlas unit, which is supplied by a single supplier (internal supplier reference SUP-117). An interruption would halt Atlas production within approximately six weeks. A second source is under evaluation. The motor controller board for Kestrel (supplier reference SUP-226) is also single-sourced. Porter does not depend on any single-sourced component.

5.2 Product safety and field reliability. In February 2025, Atlas CS units at a customer freezer site experienced lidar dropouts that caused emergency stops. There were no injuries. The root cause and corrective firmware are documented in field incident report IR-2025-031.

5.3 Customer concentration. Frostline Logistics represented 9% of revenue. Loss of this customer would materially affect results.

5.4 Currency. 31% of revenue is earned in US dollars while most costs are in euros and Indian rupees.

6. Outlook for FY2026

For FY2026 (1 April 2025 to 31 March 2026) we expect revenue growth of 18 to 22 percent, driven by Atlas and Fleet Console subscriptions, and an EBIT margin of at least 9 percent. We plan to launch Kestrel for general availability during FY2026.

Management board: Dr. Mira Okafor (CEO), Jonas Weller (CFO), Priyanka Deshmukh (CTO). Chair of the supervisory board: Helga Brandauer.

Independent Auditor's Report

To Nimbus Robotics GmbH, Berlin

We have audited the financial statements of Nimbus Robotics GmbH for the fiscal year from 1 April 2024 to 31 March 2025.

In our opinion the financial statements give a true and fair view of the net assets, financial position and results of operations of the company. Our opinion is unqualified.

Auditor: Keller & Brandt
